

I do not want the government, government officials, or anyone else not intended to read my e-mails. Trade secrets and confidential documents are transmitted and the breach of security of e-mail snoopers on these documents is inexcusable. There are methods of encryption that not even the US government can bypass, or atleast can not bypass without throwing loads of resources at it for an extended period of time. If you continue to threaten myself, and others like me, steps can and will be taken to prevent these uncalled for attempes of spying on the civilian community. We will take this as far as it needs to go to keep our way of life.
